Media Types in Your Printed Journal

Understanding what can be embedded in physical books

EMBEDDED IN YOUR JOURNAL:

■ **PDF Documents**

- Reference materials, receipts, form
- Embedded directly in the final PD

■ **Images (PNG, JPEG, etc.)**

- Photos, diagrams, screenshot
- Displayed inline where reference

CONVERTED TO TEXT REFERENCES:

■ **Video Files (.mp4, .mov, .avi, etc.)**

- Converted to plain text link
- Physical books can't play video

■ **Audio Files (.mp3, .wav, etc.)**

- Converted to plain text link
- Physical books can't play audi

WHY THIS MATTERS:

Your journal workflow automatically handles all media types appropriately for print. Videos and audio files are still referenced in your journal — they just can't be embedded in a physical book format.

Include these media types in your Capacities export! The workflow handles everything correctly.
